

Amendments to the Specification

Please insert the following new paragraphs after paragraph [20] beginning at page 6, line 8:

[20.1] Figure 3 is a block schematic diagram of another embodiment of a vibration energy harvester constructed in accordance with the principles of the present invention in which linear vibration is coupled directly to relative linear motion.

[20.2] Figure 4 is a block schematic diagram of another embodiment of a vibration energy harvester constructed in accordance with the principles of the present invention in which the magnetic layer has circular symmetry.

[20.3] Figure 5 is a block schematic diagram of still another embodiment of a vibration energy harvester constructed in accordance with the principles of the present invention in which the magnetic layer has circular symmetry.

[20.4] Figure 6 is a graph of experimental results for output power as a function of vibration force.

[20.5] Figure 7 is a graph of experimental results for the log of output power as a function of load impedance for two energy harvesters constructed in accordance with the principles of the invention.
